

Do you have problems with your Computer System?

We are a local computer support company offering ad-hoc as well as contract computer repairs. All our business is local, and we pride ourselves in offering you a personalised service for your business needs.

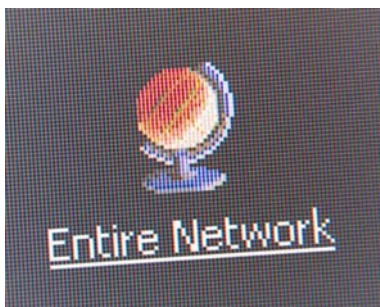

Ad-Hoc Callout, or Contract Support, you choose!

From a simple problem on a PC to a complete network failure, all faults cost your business money. We have several options to help keep your business running smoothly. All the common spares are carried with our engineers, with other items normally available next day if not in stock.

We specialise in Microsoft and Novell networks and you can relax in the knowledge that keeping your system working efficiently is what we do best. We also install and support Broadband, allowing your network to be administered and maintained remotely if you would prefer.

For more details, call or visit our website.
